1. Create a repository on github, use the format `ucid-course-section` as the repository name.
2. Make sure it's set to private
3. Go to Settings -> Manage Access -> Invite Collaborator -> Search for my ID **MattToegel** and send an invite; if your section has a grader do the same for their github username (refer to course announcements)
  1. **Note:** Once in a while the invite doesn't get created correctly and you'll need to resend it, keep an eye on the acceptance of the invite since this is required for further HW validations. A comment will be left on Canvas for the submission if the invite is missing at the time of grading).
